Remote

I build user-centered products with empathy at the core. I take ideas from ideation to MVP launch, and every decision along the way is backed by real human data. Open to product manager roles (full-time or contract) and freelance projects.

## LEADERSHIP

**Ceeravo — Team Lead** — Healthcare platform · In development

- Leading a team of 23 people to build a platform that connects patients to their chosen hospital, and to hospitals with the right equipment for their treatment.

**ProjectPilot — Product Owner** — Student-team planning assistant · 2026

- Product Owner for a remote, cross-functional team of 8; coordinated the work across Jira, WhatsApp and Google Drive.
- Delivered as the Fuse Varsity capstone.

## PRODUCTS

**Sprint Maestro — Product Manager** — AI productivity tool · 2026

- AI tool that turns raw PRDs into sprint-ready plans; cuts sprint-planning time by about 80% through automated backlog creation and estimation.

**Tiqra — Product Manager** — AI market validation · 2026

- Validation platform combining verified human feedback with AI feasibility reports, ending in a clear Proceed / Pivot / Kill recommendation for founders.

**AgroLynk — Product Manager** — Agritech mobile MVP · 2025 · Hackathon winner

- Interviewed farmers and agricultural students, then scoped and prioritised crop disease detection, localised advisory and a community feed to ship a demo-ready MVP in one weekend.
- Won the hackathon.

**Edukate UIL — Product Manager** — Learning platform · 2026

- Designed a learning platform, installable as a web app, for a university faculty to replace WhatsApp as the way course materials reach students.

## SKILLS

**Product:** Product strategy, MVP development, product validation, user research (JTBD), user journey mapping, feature prioritisation, wireframing, PRDs

**Tools:** Figma, Notion, Lovable, Jira, ChatGPT, Gemini, Google AI Studio, Antigravity, Canva
